PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Excel, SQL, Power BI, Tableau, and Python for data analysis and dashboard development. Skilled in data cleaning, KPI tracking, and business reporting to generate actionable insights. Built analytics projects including sales dashboards and predictive models, and completed a data analytics internship. Seeking an entry-level Data Analyst role in a data-driven environment.

INTERNSHIP EXPERIENCE

Data Analyst Intern

- **Fortunne – German Window & Door Systems** Dec 2025 – Mar 2026
- Supporting operations and management teams with data analysis and MIS reporting
- Cleaning, validating, and maintaining structured operational datasets
- Preparing Excel-based MIS reports, trackers, and summaries
- Assisting in KPI tracking, performance monitoring, and operational analysis

Data Analyst Intern

- **Inditronics Private Limited** Jul 2025 – Oct 2025
- Performed data cleaning, validation, and quality checks on structured datasets
- Supported data labeling and dataset preparation for analytics and ML workflows, Managed datasets used for analysis and reporting

PROJECTS

- **Airbnb Price Analysis – Python, pandas, NumPy, scikit-learn** - [Github](#) Built an end-to-end price prediction workflow using pandas and NumPy for data preparation and scikit-learn for trend modeling. Visualized pricing insights and documented model evaluation steps.
- **Retail-Sales-Analysis– MySQL, Excel** - [Github](#)
Developed SQL queries using JOINS, aggregations, and window functions to analyze sales performance and customer profitability.

- **Superstore Sales Dashboard – Power BI - [Github](#)**

Created an interactive dashboard analyzing sales, profit, and regional performance using Power BI. Used Power Query and DAX to transform data and generate key business insights.

- **House Price Prediction – End-to-End Model Development**

Tools: Python, scikit-learn, Excel - [GitHub](#)

Collaborated with developers to define business requirements and transform them into measurable outcomes. Applied data validation and system analysis to ensure model reliability. Presented business insights in a structured report for stakeholders

TECHNICAL SKILLS

- Data Operations: Data cleaning, data validation, quality checks, data labeling
- Data Analysis: Trend analysis, KPI tracking, reporting
- Tools: Excel (Pivot Tables, VLOOKUP) | MySQL (Joins, Filters, Subqueries, Window Functions)
- Visualization: Power BI, Tableau
- Programming: Python (pandas, NumPy, scikit-learn – basic usage)

CERTIFICATIONS

- Master in Data Science & Analytics with Artificial Intelligence – IT Vedant (Mar 2025)
- IBM Certifications: Data Analysis with Python, Python for Data Science & Machine Learning
- IT Vedant Certifications: Advanced Excel, MySQL, Power BI, Tableau, Python for Data Science

EDUCATION

Bachelor of Science (Chemistry)

The American College, Madurai – Graduated 2024
